Update on Your Abstract Submission

mac.edgerly@morressier.com kepada saya

Sel, 18 Mei 2021, 18.27

Dear Siti,

Thank you for your submission to the Irish Section Conference 2021. I am delighted to inform you that your abstract **Herbal tea bag** formulation from a mixture of black tea, cinnamon, and cardamon with mixture design method has been accepted for presentation and publication with the *Proceedings of the Nutrition Society*.

You will find comments from the reviewing panel by logging in to Morressier Platform.

You will be required to present your abstract virtually through the e-poster software, Morressier. At the Irish Section Conference 2021, all Original Communications will be **poster presentations**.

Your poster will be submitted through the Morressier platform and displayed alongside your abstract. You will also be asked to submit a 4-minute video presentation.

Further information and guidelines on preparing and uploading your poster and presentation will be distributed shortly. To note, this information will be sent to the author indicated as the *Presenting Author* on your original submission.

Abstract Status - Nutrition Society Irish Conference

mac.edgerly@morressier.com kepada saya

Sen, 10 Mei 2021, 19.01

Dear Siti,

Your abstract **Herbal tea bag** formulation from a mixture of black tea, cinnamon, and cardamon with mixture design method, Abstract ID: 25 is being considered for acceptance for the Nutrition Society Irish Section Conference 2021. Currently, your abstract has been scored as borderline. For the opportunity for your abstract to be progressed to accepted for presentation at the conference and for subsequent publication in the *Proceedings of the Nutrition Society* you are required to make amends to your abstract based on comments from the reviewing panel, which you can find below:

The aim of the study should be clearer - it is unclear what would constitute a 'best formulation' and this should be clarified- at present there is a lack of linkage between the methodology and results. Please clarify in the abstract what data is being presented - are these 16 different formulations and in the case of each how many replicates were tested. In relation to hedonic qualities was a taste panel employed - details should be included.
